

- GET List of Films
- GET Film Detail
- POST Upload New Film
- PATCH Update Film
- DEL Delete Film

Setelah pengguna melakukan seluruh prasyarat di atas, pengguna dapat melakukan request sesuai yang dibutuhkan, sebagai berikut.

Method ini digunakan untuk melihat seluruh list film yang tersedia pada API ini.
Response sukses dari method ini ditandai dengan code "200" dengan message "OK"

Method ini memiliki fungsi yang hampir sama dengan method di atas. Hal yang membedakan ialah method ini harus disertai dengan parameter id film sehingga pengguna dapat melihat informasi detail dari suatu film. Response sukses dari method ini ditandai dengan code "200" dengan message "OK".

Parameter	Deskripsi
id	id dari film yang ingin dilihat detail informasinya.

```
1
{
  "code": 200,
  "message": "OK",
  "data": {
    "id": 1,
    "title": "Bad Genius",
    "genre": "Drama",
    "film_image": "https://m.media-amazon.com/images/M/MV5BMzIxMTFMD
    "rating": 7.6,
    "description": "Lynn, a View More school student who makes money
```
